COYOTE Installation Training Systems®

Michael R. Palmer

COMMTECH Communications, LLC

Developer of The COYOTE Installation Training Systems®

COYOTE Installation Training Systems®

Introduction

- The COYOTE Installation Training Systems ® is comprised of ten low-voltage systems built on five double-sided communication system trainers developed by COMMTECH Communications, LLC.
- Each trainer is a comprehensive compilation of technical information and hands-on lab intervention modules designed to give the student the skills necessary to install, service and maintain low-voltage systems.
- The COYOTE Installation Training Systems ® are designed for individualized training of students considering a career in the low-voltage industry.

COYOTE Installation Training Systems ®

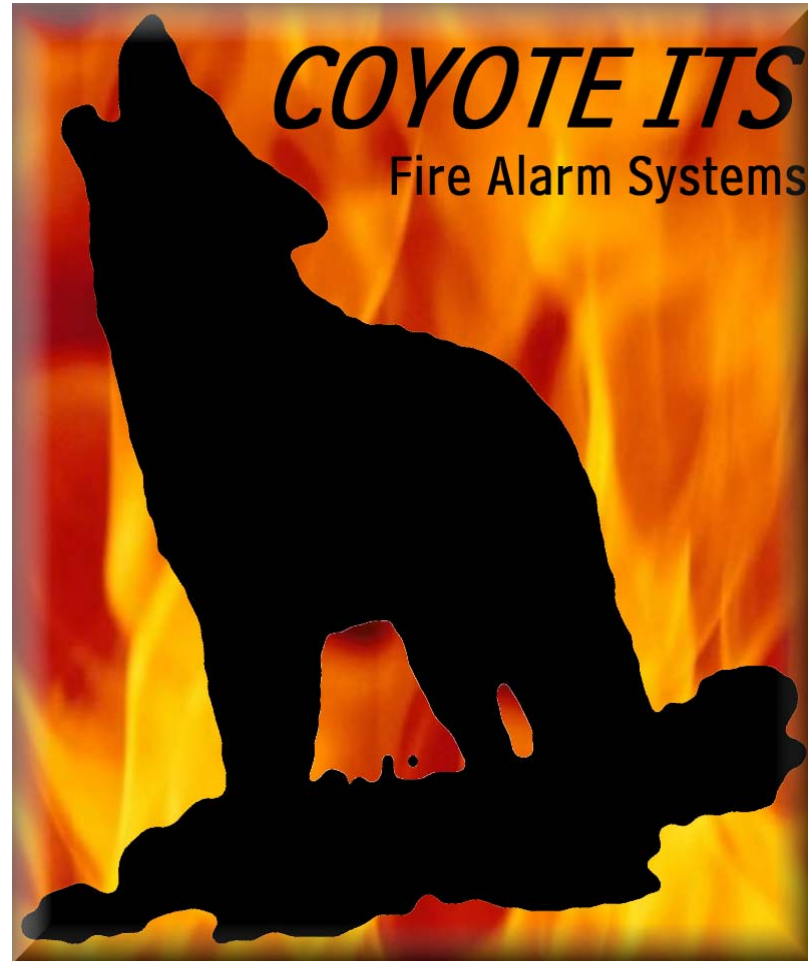

The COYOTE ITS Emphasis

- Instructor-Student user friendly curriculum! We wrote the it so you don't have to!
- Even if you have never taught low-voltage systems you can train students in this challenging and dynamic industry.
- Built in each curriculum is content relevant for each prominent professional certification.
- A step-by-step process including:
 - Trainer
 - Lesson Plans
 - Textbook Reading
 - Review Questions
 - Lab Exercises
 - Examinations
